SAGLO Soft Micro Imaging is a basic image acquisition software. The user who simply wants acquire a still image or a video, with no need to perform measurements, has, with this powerful and intuitive software, the perfect solution.

- Simple management of «live» image
- Acquisition of still images or video
- Basic imaging functions
- Background correction

Simple management of «live» image

Image preview is freely customizable by the user. A simple White Balance function with a mobile spot allows to perform the balance even on very small areas, once the specimen has been framed and focused.

Basic functions:

- Automatic or manual acquisition
- Possibility to have «live» and «capture» at different resolutions
- White Balance with mobilespot
- Background correction for the acquisition of perfectly illuminated images.

Capturing still images or video

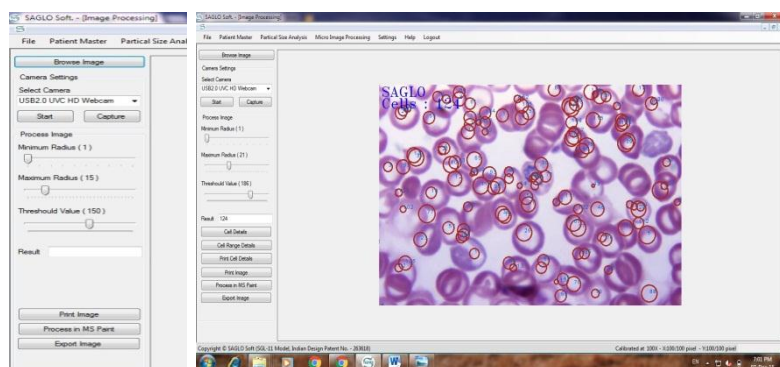

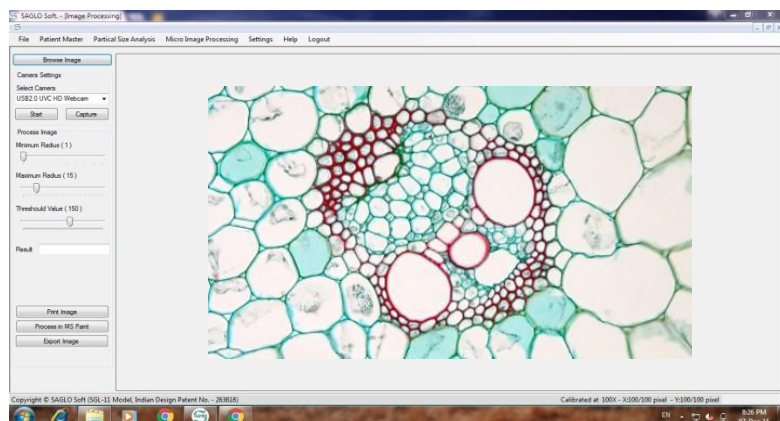

Just select the option and the software performs: acquiring still images or videos is simply and intuitive.

Basic imaging functions

Image parameters can be modified according user's needs. Color, Contrast and Gamma can be changed in real time. More, it is possible to use a color camera in «SGrey Scales» modo in order to increase the camera sensitivity.

Background Correction

Any inhomogeneity of illumination of the microscope can be corrected by using the background correction function. This allows to obtain a faithful reproduction of the image without annoying inhomogeneity due to a not perfect illumination.

Extended Depth of Focus (EDF)

Single Focal Plane Images

EDF Image

Stitching & Tiling

Get an image with high resolution but, at the same time, have a wide view of the specimen under observation. Impossible? No. The multiple image alignment function allows to get a single image starting from adjacent images of the specimen.

Separate Images

Stitched image

Measurements

User can perform measurements on the «live» image (no need to capture an image) and on captured images.

Report generator

At the end of the analysis it is possible to export images and measurement results either on a Excel sheet and on a Report Generator in MS Word format.

The template is freely configurable and can be modified according to laboratory standards.
